Milton's Airways, LLC is a company, which was founded in the year 2009 and has been responsible for an airport, which met the exacting standards of global companies and won many prizes in the ranking of the leading airport over the world. The company's investors were expecting to maintain all the traditions of the industry. However, after just a year, an old investor pulled out the company. Upon the invitation of a foreign investor, Lee Milton took over the agency, and she invested her company in a new state. However, Lee Milton was wrong with her decision: the new city didn't fit into the industry. She couldn't get any financing, so Lee decided to sell a lot of the assets of the company and arrange the construction of a new airport. Without any money, she needed to collect funds from her investors, who were not in favor of the idea, for each of the funding, but instead of this, she

quickly raised her own funds. And because there was no opposition, Lee increased the debt by its initial value. The gloomy day of the airport's opening was a real nightmare for the young manager, who received an overdue payment. For each day without the payout, it became worse for Lee. Finally, the last day of the agreement came and no money for Lee and she had to close the airport immediately and to open it again after a year. You have to find the criminal who is a mastermind hiding with the possessed drug in the city. You have to cooperate with your friends on the site to find the culprit in this detective caper! We hope that our game will be a pleasant addition to your daily habits, that you'll want to play, and that you will be able to help your friends to find the one responsible. We all had one hobby when we were young: in our free time we would play a lot of board games like Jenga, Battleship or Battle Island. But I think that if you ask anyone of the people at playerkunst, they will tell you that their favorite board game is the Sushi Go! Why it is a favorite of artists? Well, the structure of the game, although it is not very sophisticated or deep, is quite funny and playful, so it is not a very serious game, but on the contrary, if you play it you can feel happy. But like all our games, those who play the Sushi Go! feel satisfied and leave with a smile on his face. If you want to know more about

us, you can go to our homepage at www.playerkunst.com and you will find our latest news as well as the board games that we created. Hi! This is The Tester from playerkunst.com and you're watching a tutorial about the popular Japan game: Sushi Go! What are the rules? The rules of this board game are very simple: You start with a bunch of small shiny rice balls. One by one you drop the rice balls on the board. At the moment you put a rice ball on the board you can only see where it is: that means you can only guess where the rice ball has gone to. As a result of this, you will start seeing bananas and scallops on the board in the form of small holes. The idea is to slide the rice ball to an empty space and eat the food that was left behind, as well as the rice balls that were taken. You have 10 minutes to eat a new rice ball, this time surrounded by many bananas and scallops. Did you enjoy this tutorial? I hope you did! If you want to learn more about Japan, you can go to our Japanese page, and if you want to see other interesting board games you can go to our suggestions page. We hope
