The creators of The Islander: Town Architect who have already made several successful games were looking for the next step, some perfect game to focus in where people could play and enjoy the beautiful graphics and mechanics of game design, we think we found the perfect little game. Island Traits: A new, immersive island building experience that will allow you to build towns made of hundreds of unique and precious buildings, crafted by a small, dedicated and experienced team. The Islander: Town Architect is a relaxing island building

experience, similar to the SimCity series. In this game, you can build as many buildings as you like, by yourself or with your friends. The landscape of your island is completely open so you can expand and urbanize your island as much as you want. As a wise chief once said, "Those who do not take time to wonder, do not experience wonder." The Islander: Town Architect is a place where you can Build Your Wonders. Key Features: Build your island! • Build many elements and decorations to add life and magic to your island. • In this game, you can build your island anytime, anywhere. Share your island with friends! • Share your island with friends via Facebook or Google+ and invite them to visit your island. Your island stays with you! • Never lose your island file or the history of your island. Full control over your island! • Your island is yours! With this feature, you can be the architect of your island. Crazy island graphics, characters and people! • You can customize island graphics and characters freely. Easy management of your island! • Easy management of your island thanks to native help system. Easy control of your island buildings! • Easy control of your island buildings thanks to native help system. Plenty of buildings to choose from! • Choose from many types of houses and buildings, right from a few apartments to a grand cathedral. Island is for everyone! • A complete city simulator for everyone, regardless of age or skill. What's new:

The Mill Blackbird VR Experience simply cannot be described in words. An unforgettable visual and audio concert that will have you on the edge of your seat, it will keep you up all night with a mix of intrigue, worry and pleasurable anticipation. The blackbird is a legendary symbol in Westbury, reminiscent of our friendly neighbourhood cats. It's a bird with a dark halo of feathers, seeming to carry the span of the Milky Way on its wings in to the night. Its perfect voice, hypnotic at times, disturbs the sleep of those who listen. It has been called many things. "The brown bird of Westbury" as some have called it, while others refer to its song as "that bird's melancholy song"... Those wonderful traits however, cannot simply be encapsulated in words or angles. They have to be experienced to be understood. It has toured the world, and is always an important part of the movements of the bands who let him perform with them. This Bird, with his unusual character, has something special in him. It's been said, that he is the heart of the music... THE BLACKBIRD is a songwriter, frontman and creator of much of the visual and audio illusions of one of his bands, The Leger Blouffe, on their 'Dean Blouffe - The Road I Choose To Take' Rumspringa Tour. He invites you to a unique and intimate mix of visual and audio illusion performance which has been marketed worldwide by his bands as a New Frontier Experience. "It's been said, that he is the heart of the music". Maybe it is time for a new song, one that is of the future, not the past... HELLO TO THE MYSTERIOUS GOSSIPERS! THE STORY OF THE LILLIE I used to dream of a Lillie. Well not really, it would be a dream come true to wake up in a garden with a Lil pretty in my bed. But not really at first, because you see it is not really just a garden It's a very special garden. Because it is not really your garden, but a Lil is laughing. Like the one you were told about, right? She is sat on top of a beautiful Beech tree with white thatch and h

We're a small group of friends who really enjoy working together to create fun, competitive games. As a small developer, we have the freedom to do what we want to make the games we want to play, but we need the support of people like you to keep making those games. Every purchase helps us continue to grow and develop. If you want to find out more, feel free to check out our website at www.HiddenContentStudios.com. You're browsing the App Store looking to find a cool new game. You click on a few, and before you know it you're playing them all, or at least the first couple. By the time you get through 10-20% of the games on the store you start to flag a few as repetitive, or you might get a little bored of endless waves of boring zombies. The fact of the matter is that, as the App Store grows, so does the competition for players. It's tough for developers to stand out from the crowd and offer players something that is unique to their game. Luckily, a few have taken the time to do just that. Games that we would put into the "unremarkable" category without even doing any research. You are here to find out who they are, and why you should be playing their games. Wargroove A real sleeper of a game, Wargroove is a turn-based strategy game where you make your characters fight for survival in a war-torn world. What makes it even better
